FAQ's:

Can I add texting to our office numbers or only numbers we get from Segway?

Yes. We can add texting to any US or Canadian landline or toll free number. (No cell phone numbers. They already have texting.)

Do I have to buy any equipment or hardware?

No.

Do I have to download any software or apps to make this work?

No.

Do my customers have to do anything different to text to my landlines or toll free numbers?

No.

I don't want to change my phone service or carrier.

You won't. We don't touch your phone service or carrier.

Ok. If I don't have to buy any equipment or download any software or apps and you're not touching my phone service, how does it work?

When someone sends a text to your landline or toll free number, we grab the text before it dies as undeliverable, convert it to an email and email it to your email address.

We can even send it to more than 1 email address.

Do I have to sign a long term contract?

Nope. Month to month, with only a two month minimum and you still get your First Month Free!

Once I signup, how long will it take to start working?

Typically, only a couple of hours. It has to propagate through the many texting networks.

Can you text enable numbers outside the US and Canada?

Yes. We have phone numbers in 176 countries. Currently, we can text enable numbers in 19 countries and we're adding more as fast as we can.

How come I haven't heard about this before?

It's new. We spent a lot of time and money to bring this new technology to you.

How do I get started?

Easy. Just fill out the form below and email or fax it back to us at texting@SegwayCommunications.com or by fax to 310.859.2226.
